

PermaSEAL PRO Protection Fleece 300

Features

- 100% recycled material
- Recyclable
- Rot Proof
- Conforms to GRO requirements for performance for a protection layer
- ETA-13/0557
- Mechanically strengthened

Technical Details

<i>PermaSEAL PRO Protection Fleece 300</i>	Technical Details
<i>Membrane</i>	PP/PES/Acrylic Recycled Fibres approx. 300g/m ²
<i>Geotextile robustness class</i>	GRC2
<i>Thickness</i>	Approx. 3.6mm
<i>Water reservoir</i>	Approx. 2.0 l/m ²
<i>Weight</i>	30.0 kg per roll
<i>Colour</i>	Multicolour
<i>Roll length</i>	50m
<i>Roll width</i>	2m

Description

PermaSEAL PRO Protection Fleece 300 is a recycled plastic fibre fleece, designed to protect the waterproofing layer within a green roof system. The protection fleece membrane protects against light mechanical damage, during and after construction.

It can also store additional water for certain applications and act as a separation layer between incompatible substrates in a green roof system.

Made from 100% recycled material and fully recyclable, the PermaSEAL PRO Protection Fleece 300 suits the environmental credentials of a green roof perfectly.

Storage

Store upright in dry conditions at temperatures between 5°C and 25°C. Do not expose to freezing conditions or direct sunlight. Protect from UV.

Health & Safety

Please use the product only in accordance with the information given in this datasheet and the installation guide. There is no legal requirement for a safety data sheet for this product.
